Near-Flawless Victorian Gem 5 Cents from Hong Kong

近乎完美 維多利亞香港五仙

51027

HONG KONG. 5 Cents, 1874-H. Heaton Mint. Victoria. NGC MS-69. KM-5; Mars-C8. Out of the original mintage of 280,000 specimens, this incredible survivor stands with just one other example as the finest known—a population of a scant two at NGC and none at this level seen at PCGS. Exceptionally vibrant and lustrous, this shimmering piece offers a rather alluring iridescence highlighted by some pull away toning around the legends. For the connoisseur of Hong Kong issues, it should go without saying that this rather beautiful specimen would serve as a crown jewel and features quality that is seemingly impossible to improve upon.

1874-H年香港五仙銀幣。喜敦造幣廠。 正式發行的280,000枚中,此枚位列NGC最高分,僅有一枚同分,PCGS無同分。外表 光澤躍動耀目,通體虹彩,文字邊緣有些許包漿。藏家心選,在任何香港錢幣集藏中,均當屬絕對出眾,品相絕美。

\$10,000-\$15,000

51028

HONG KONG. 5 Cents, 1875-H. Heaton Mint. Victoria. NGC MS-63. KM-5; Mars-C8. Lightly toned and without marks, this minor presents steely gray brilliance glistening throughout. What appears to be a planchet flaw on the "V" of "VICTORIA" is actually a die crack.

1875-H年香港五仙銀幣。喜敦造幣廠。淺包漿,無留痕,鐵灰色澤,光澤透。"VICTORIA" 中 "V" 上的坯餅缺陷實爲模具開裂痕跡。

\$600-\$900

51029

HONG KONG. 5 Cents, 1877-H. Heaton Mint. Victoria. PCGS MS-68 Gold Shield. KM-5; Mars-C8. A good deal of argent brilliance is noted on the obverse, while the reverse instead features rather deep toning with a delightfully charming pull-away effect. An incredible grade for an equally incredible minor.

1877-H年香港五仙銀幣。喜敦造幣廠。正面銀光豐沛,反面包 漿色澤頗深,深邃迷人。高分精品。

\$8,000-\$10,000

The devices are crisp and frosty while the satiny luster pops out while rotating in the light adding to its pleasing appearance.

1883年香港五仙銀幣。倫敦造幣廠。原始度高,斑駁的包漿於正面,反面淺日落彩霞色調。圖文霜面,燈光下絲滑光澤透現,美不勝收。

IRAN. 25 Toman, AH 1301-B (1883/4). Tehran Mint. Nasir al-Din Shah. NGC Unc Details—Tooled. Fr-58; KMX-8. Weight: 71.41 gms. Brussels mint reverse die. EXCEEDINGLY RARE and highly elusive, this type exists in restrikes which come to the market from time to time, but original such as presented here are seldom seen. In recent memory, only the Adams specimen has crossed the auction block since this example's last appearance in 2002; the Adams piece, graded at the time in 2016 as "EF, with hints of deposits and edge marks at 7 o'clock on the reverse," realized a total of \$54,000. This specimen, though noted on the holder as having tooling, doesn't really exhibit anything to indicate as such, though some lightly scattered marks and hairlines are observed. Exceptionally lustrous and sharp, with great brilliance and assuredly an impressive and monumental piece.

This charming example displays lovely pale orangegold tone over lustrous surfaces with a hint of an iridescent sheen adding to its pleasing appearance. Both sides exhibit numerous small chopmarks as is commonly encountered on early Koban issues accounting for the details designation adding a bit of character. JAPAN. Akita. 4 Momme 6 Bu, ND (1863). PCGS AU-53 Gold Shield. KM-10; JNDA-09-72. Weight: 17.15 gms. Value in four characters vertically at center of thin silver bar with rounded ends. Four circular stamps each side with an additional character stamped near top of obverse, bottom of reverse. A well stamped piece with deep gray toning and pleasing dark rainbow hues in the recessed obverse lettering.

An interesting fact about the Akita and Morioka province issues is that the denomination stamps are applied with a gang punch rather than individual punches. This is the reason that so many of these have uneven or cockeyed denominations and parts that are weak or sometimes missing altogether.

1863年日本秋田省四匁六分。重17.15克。面值"四匁六分"豎直刻於銀幣中央,筆劃圓潤。兩面各有四枚流通戳記,正面上方及反面下方另戳有一字樣。鑄工精美,深灰色包漿,正面字樣凹陷處有深虹彩色澤。秋田及盛岡版別的面值戳使用的是複合模,而非獨立模具。因此常見面值鑄打不均匀、向一側傾斜、部分弱打甚至缺失。

Extremely Rare — Never Released for Circulated — 5 Sen One of Only a Few Known

極其罕見-從未發行流通-五錢 寥寥數枚存世之一

51225

JAPAN. 5 Sen, Year 13 (1938). Osaka Mint. NGC MS-65. KM-Y-53, JNDA type of 1-40 (Unlisted), J&V-V134. Mintage: 10,000,000. This EXTREMELY RARE circulation issue, technically the last date of this type and missing from most advanced collections, was placed into full production ready to be issued, but was never released. This little Gem exhibits crisp well-defined design features, sharp calligraphy, smooth brilliant surfaces and contesting frosted derives. The Japanese series contains many rarities, but seldom do the subsidiary issues obtain this high a status; especially so for a business strike with such a large mintage. The opportunity to acquire a minor coin of this caliber should not be taken lightly. Serious consideration is a must from advanced collectors and completionists for the chance to add this elite 5 Sen to their numismatic holdings.

According to collector and author Dr. Norman Jacobs, a previous owner of this sneaky rarity, during the second Sino-Japanese War (World War II in the west) nickel had become an important commodity for the war effort. By the time this coin was struck in 1938, the material is which it was made had become a critical aspect of the war effort. It was decided to melt them down to repurpose the metal. Dr. Jacobs was only aware of two examples that survived the melting pot. Also, the SCWC states a rather large mintage figure for this issue and suggests that only four examples survive today. Regardless of the amount known whether, 2 or 4, it is for certain that this issue is of the highest rarity destined for a fine cabinet.

日本昭和十三年五錢。大阪造幣厰。鑄造量10,000,000枚。極罕流通版,嚴格來說是此品種的最後一年發行,於大部分集藏中從缺。當時新鑄幣已完全投入生產,準備發行,但最終胎死腹中。圖文深邃,銘文銳利,幣面光滑耀眼。日本錢幣中珍品眾多,但鮮少有小面值能獲如此高評、鑄額龐大的流通幣尤爲難得。將稀罕的五錢納入囊中的絕佳機會,不容錯過。收藏家和作家諾曼-雅各布斯博士(Norman Jacobs博士)藏中曾有此枚"不見天日"的罕品。據其研究,在第二次中日戰爭(西方第二次世界大戰)期間,鎳成爲戰爭投入中的重要商品。1938年投產此幣之時,鎳在戰爭投入中占據重要位置。政府因而決定將鎳幣熔化以作其他用途。雅各布斯博士只知有兩枚倖存至今,而 SCWC 指出了此發行有相當大的鑄幣量,認爲存世有四枚。無論是二或四,此幣無容置疑是最高級的珍品。

JAPAN. Silver 10 Yen Pattern, ND. Bureau Mint. PCGS SPECIMEN-62 Gold Shield. KM-Unlisted; JNDA-Unlisted; Bank of Japan-Unlisted; ANS-Unlisted; BM-Unlisted; Hartill-Unlisted; JV-Unlisted. 20.5 mm. A fascinating issue without denomination struck on a silver planchet. The obverse exhibits three characters "Zō hei kyoku" indicating "Monetary Bureau", with three Paulownia flowers in identical formation to the obverse on the reverse indicating coin alignment. It is interesting to note that we were able to locate a six different examples, all from Japanese auctions struck in brass or copper, from this series all containing a central letter "A", "K" or "S", but none that were missing the central letter altogether such as the present example. It also appears that the present piece exhibits a mint made file mark on the reverse, perhaps as a weight adjustment that none of the others display which were struck in lesser metals. This highly interesting issue is perfect for the academic collector wishing to scour Japanese mint records in search of answers for this enigmatic issuance.

日本十圓銀樣幣。政府造幣廠。 饒有趣味的一枚無面值銀樣幣,銀坯打模。正面三字造幣局,背面三朵桐花與正面的三字佈局相同,水平反轉後前後圖案的方向一致。引人入勝的是,我們可找到六枚同款,均是以黃銅或銅鑄,中央鑄有呈如"A"、"K"或"S"的英字,但此枚的中央英字則從缺。且反面有出廠時所留下的銼痕,可能是調整重量所致,而其他同款因爲鑄打時使用的金屬量較低,並無此痕。風格獨特的一枚,適合對日本樣幣鑄造學術研究有興趣的藏家。

Outstanding 1906 10 Won Struck in Osaka

完美光武十年十圜大阪鑄造

51234

KOREA. 10 Won, Year 10 (1906). NGC MS-66. Fr-2; KM-1130; K&C-28.2; JNDA-18-14 (14); C-52, JV-AD5. Diameter: 21.4 mm; Weight: 8.31 gms. Mintage: 5,012. Reeded Edge. Tied for the finest certified of the date with one other example on either the NGC or PCGS population reports. The obverse depicts an Imperial Japanese dragon coined in a dotted circle clutching the mythological Pearl of Celestial Wisdom, outer legend states the national name Dae Han, Regnal date year 10 (1906), denomination in the Korean phonetic alphabet; Reverse: Vertical denomination under Korean Plum Flower Crest, all in wreaths composed of Rose of Sharon and Plum branches. Few examples survive today, and this wonderfully pedigreed piece, with glowing yellow-gold luster, an entirely crisp strike and surfaces on the dragon side that are virtually pristine. A can't-miss opportunity for the collector of elite Asian gold coinage worthy of a fine cabinet of the connoisseur!

The regnal name Kuang Mu, "Military Illustriousness," was assumed by King Kojong, in 1897 and appeared on the last Korean coins struck at Osaka to Japanese specifications. The Won coins show a Japanese-style dragon grasping the Celestial Pearl, unlike the Chinese dragons that only pursued this mythological symbol of wisdom. The gold coins of 20, 10 and 5 Won appeared just before Korea's independence ended with the Japanese occupation. Of the limited quantity struck in the 10 Won denomination, most were kept in the Dai Ichi Ginko, Bank of Japan, as backing for gold notes, and nearly all were subsequently melted after the annexation.

大韓光武十年十圜金幣。大阪造幣廠。直徑21.4毫米,重8.31克,發行量5012枚,齒邊。NGC及PCGS評鑒最高分,僅有一枚同分。正面爲日本皇龍在珠圈內,爪抓神話中的智慧天珠。珠圈外有"大韓光武十年"字樣(1906年),以韓語標註"十圜"。背面上部爲朝鮮梅花冠,下爲中文"十圜",花圈環繞。本版別僅有少量留存,此枚流傳有序,散發醇美金色光澤,龍面鑄打精深,宛如新鑄,是亞洲金幣藏家不可多得的臻選。1897年,高宗以"光武"作爲年號,印有此年號的韓國錢幣,是最後一批在日本大阪鑄造的錢幣。日製韓國錢上的龍帶有日本特色,區分於中國龍銀。面值爲二十圜、十圜和五圜的製錢發行時間短,不久後日本便侵佔了韓國,韓國作爲獨立國家的歷史中斷。十圜本就鑄量有限,大部分都保存在日本央行作爲金圓券儲備金,並在日本侵吞韓國後被熔毀。

Although the lines across the eagle are traditionally called adjustment marks, they are more likely the result of defects in the rollers used to flatten the strips of silver prior to the planchets being punched. This truly fantastic proof set is comprised of magnificent looking representative of these types. Each piece meticulously engraved with expressive portraits, crisp devices and hard flashy fields. The frosty designs stand out against the reflective surfaces offering a nice cameo effect. The appearance of each piece is further elevated by the gorgeous rich brown patina and beautiful mottled iridescent coloration of cobalt and magenta. These highly attractive special issues seldom appear on the market as individual pieces while complete sets are few and far between. Serious consideration should be given by potential bidders for the opportunity to acquire this **EXTREMELY RARE** and fabulous set. Accompanying the coins is what appears to be the case of issue, however the top is broken.

The single second finest certified of the date on the PCGS population report with only one finer (PCGS MS-64). An absolutely outstanding representative of the type leagues better than normally encountered boasting strong design features, lustrous surfaces and gorgeous rich rainbow colored patina dripping with originality. SINGAPORE. Lead Uniface Reverse Trial Keping, AH 1250 (1835). Soho mint, Birmingham. Fighting Cock series. PCGS Genuine—Environmental Damage, AU Details Gold Shield. cf. KM-Tn4; Prid-34; SS-44. Weight: 8.95 gms. Struck on a broad flan, this interest issue displays bold design features with a lovely mottled brown color and naturally rough surfaces on the reverse. The obverse does show a couple of areas of discoloration with slightly rough surfaces accounting for the details designation, but are unobtrusive adding a bit of character. Despite its shortcomings a handsome piece with a good provenance sure to see spirited bidding from advanced collectors.

It is interesting to note that the brown coloration appears to be remnants of bronzing or copper plating of some nature. This would seem to make sense as this is a trial of a copper issue, but this is unconfirmed and only the opinion of the cataloger.

SINGAPORE. Keping, AH 1147 (1831). PCGS VG-10 Gold Shield. Prid-29; SS-35. Error in date. This well-worn and charmingly crude issue seldom appears on the market and should be considered VERY RARE. The strike is decent with even wear and smooth surfaces displaying lovely rich chocolate and mocha patina that is pleasing to the eye.

According to the Saran Singh author of "The Encyclopedia of the coins of Malaysia Singapore and Brunei" who believes that this issue with the error date is probably a local imitation. This is based on the crude nature of the die engraving and the fact that the quality of manufacture is well below the standards of products that the Soho mint would produce.

This charming little survivor exhibits nice honest wear with light gray tone and a lovely light iridescent sheen that pops out when tilted in the light. The obverse does have a couple of small hit marks in the fields which accounts for the details designation, but don't detract from its pleasing appearance. Despite its shortcomings this off-metal version seldom appears on the market sure to add depth to the next collection it enters.

According to Major Fred Pridmore there are more than 470 die variations for this issue. He further states that examples struck in nickel or brass should be considered **RARE**.

SINGAPORE. Copper Trial Strike Keping, ND. Soho mint, Birmingham. Fighting Cock series. PCGS Genuine—Tooled, EF Details Gold Shield. Prid-70 (plate coin); SS-89 (plate coin). This highly interesting trial issue exhibits the familiar fighting cock motif, but the reverse is a series of beaded borders, one central with two outer. The strike is fairly bold, but does show a bit of flatness on the reverse in the outer border and a hit mark that can be seen from the obverse. The fields in front of the cock exhibits light tasteful smoothing from long ago now toned over matching the rest of the coin. This attractive survivor exhibits even wear on both sides displaying light brown coloration on the high points complemented by rich chocolate brown patina in the fields offering a pleasing appearance. Despite its shortcomings this seldom encountered trial issue is quite handsome destined for an advanced collection.

Massive Mint State Silver 4 Baht Struck to Commemorate Rama IV's 60th Birthday

華麗銀泰銖 泰皇拉瑪四世六十誕辰

51364

THAILAND. 4 Baht (Tamlung), ND (1864). Rama IV. NGC MS-61+. K-pp. 332-3, pl. 139; KM-Y-A12; SSC-pl. IX#2a/b; LeMaypg. 94, pl. XXII#1. Struck to commemorate Rama IV's 60th birthday. The obverse depicts the standard design as found on regular circulation issues of this era, while the reverse displays the central inscription "Kingdom of Siam" within a cubed star frame along with the Chinese inscription around "Cheng Ming Tung Pao" (Negotiable Currency of Cheng Ming). The finest graded by NGC, with a deep gray cabinet tone and charming eye appeal. VERY RARE and supremely enticing. This massive silver issue boasts a bold even strike, well-defined motifs and trivial sign of handling consistent for the grade primarily contained to the high points. The rich old cabinet patina and minor earthen deposits in the crevasses of the obverse offers much originality. Lovely shades of light gray to slate patina highlight the design features adding to its pleasing appearance and overall desirability. A type that appears on the market with some frequency in EF-AU conditions usually showing signs of maltreatment, but is seldom available in this high state of preservation. This attractive commemorative issue, far nicer than normally encountered, is destined for a fine cabinet of the discerning collector.

It is believed that these pieces were never released for circulation and were struck for presentation to important Thai and Chinese citizens. According to Kann, the reason for the addition of a Chinese inscription on this ceremonial type was that China's influence inside Siam, while less prominent than in previous ages, was still significant.

1864年泰國4泰銖。拉瑪四世。泰皇拉瑪四世六十誕辰紀念幣。正面爲標準設計,背面方形四角星中爲泰文"暹羅王國",外周爲中文"鄭明通寶"。NGC評鑒最高分,深灰色包漿更添誘人。十分珍罕,攝人心魄。

據信,這類鑄幣從未公開流通,而是鑄作展示幣,展示給泰國和中國的王公貴族。Kann著述記載,在此款紀念幣上加鑄中文的原因是,其時暹羅仍是中國的屬國。暹羅在國內有自治權,但中國仍掌控暹羅部分事宜。

THAILAND. 4 Baht (Tamlung), ND (1864). Rama IV. NGC Unc Details—Cleaned. K-pp. 332-3, pl. 139; KM-Y-A12; SSC-pl. IX#2a/b; LeMay-pg. 94, pl. XXII#1. Struck to commemorate Rama IV's 60th birthday. The obverse depicts the standard design as found on regular circulation issues of this era. The reverse displays the central inscription "Kingdom of Siam" within a cubed star frame with the Chinese inscription around "Cheng Ming Tung Pao" (Negotiable Currency of Cheng Ming). The devices are boldly struck with good definition of the fine details, both sides show evidence of being cleaned long ago now slightly subdued by a thin layer of tone with richer coloration near the rims, the reverse does exhibit several minor disturbances in the fields and surface marks mentioned for the sake of accuracy. Despite its shortcoming this is a handsome example of this ever popular type in fairly high graded sure to be a welcome addition to the next collection it enters.

It is believed that these pieces were never released for circulation and were struck for presentation to important Thai and Chinese citizens. According to Kann, the reason for the addition of a Chinese inscription on this ceremonial type was that China's influence inside Siam, while less prominent than in previous ages, was still significant.

1864年泰國4泰銖。拉瑪四世。泰皇拉瑪四世六十誕辰紀念幣。正面爲標準設計,背面方形四角星中爲泰文"暹羅王國",外周爲中文"鄭明通寶"。鑄打精深,細節淸晰,雙面有老洗痕跡,現已有薄薄一層新包漿,靠近邊緣處色澤更濃郁。背面底板處有些許傷痕及表面瑕疵。瑕不掩瑜,仍不失爲經典之選,品相上佳,定爲集藏添彩。 據信,這類鑄幣從未公開流通,而是鑄作展示幣,展示給泰國和中國王公貴族。 Kann 著述記載,在此款紀念幣上加鑄中文是受中國文化對暹羅的影響。其時中國文化的影響雖不如過去幾個王朝顯著,但仍深遠。

Often times the translation of Qilin from Chinese to English is "Unicorn", but this is somewhat misleading as they can be found depicted with one or two horns. In modern times a separate word "Dujiaoshou" is used in Chinese for "Unicorn" and though a number of Chinese mythical creatures can be found depicted with one horn a Qilin with one horn would be called a "one-horned Qilin" in Chinese not a "Unicorn"

Bronze Age Coinage

With a form of coinage dating back over two millennia, China has had a rather extensive numismatic history. It is China's modern commemorative program, however, that has become a standard bearer within the market, continuing to produce hotly contested and greatly sought-after coins in a variety of designs, metals, and denominations. In order to celebrate the 30th anniversary of Mao Zedong's founding of the People's Republic of China, a series of commemorative coins were issued in 1979—an event that would serve as the spark for what would become a modern commemorative juggernaut. Not long after, the immensely popular 'panda' series would debut in 1982, with its endearing designs captivating collectors around the world. Other series would eventually follow, such as those highlighting the various Olympic games and their events, those featuring the enigmatic and fabled unicorn, those honoring past cultural figures and icons, and even those paying homage to bronze age relics, artifacts, and other historical items.

This final group, the so-called "bronze age" series, first appeared in 1981, with a group of four fauna-inspired figurines decorating various gold denominations. Another round, this time in 1990, was released paralleling the previous issues, but instead in silver and accordingly in smaller denominations. Just two years later in 1992, a third installment was struck in both gold and silver with new takes on this popular series. Given the rich history of the vast nation, a wealth of historical

中國的鑄幣史可以追溯至兩千年前,其錢幣歷史源遠流長,但成為市場中流砥柱的卻是中國現代紀念幣。設計、金屬、面值各異的紀念幣層出不窮,深受消費者追捧,甫上市便會引發搶購。為慶祝主席毛澤東建國30週年,中華人民共和國於1979年發行了一系列紀念幣。建國紀念幣後來亦成爲現代紀念幣中長青不朽的主題。不久後,蔚然成風的《熊貓》系列於1982年首度亮相。引人入勝的設計使全球收藏家爲之傾心。自此之後,中國陸續推出不同主題的貴金屬念幣,如紀念奧運會賽事、刻畫神話瑞獸麒麟、緬懷傑出人物、甚至是向工藝品、歷史物品及青銅器時代文物致敬。

最後一組俗稱《出土文物》系列,首現於1981年。一套含四枚金幣,金重及面值不一,以出土青銅器文物為主題。第二套於1990年推出,沿用上一套的設計,但以銀製,面值亦較小。僅僅兩年後的1992年,第三套同系列金銀紀念幣推出。設計理念與前兩套相同,但採納了

treasures was at the forefront to be included into this project, leading to many proposals being delayed or even outright rejected during the series's first round in 1981. Some designs did, in fact, find their way into the 1992 release, while others were never utilized for the project. The way in which we know of such superfluous designs is not through mint records or even sketches, but from actual brass patterns struck in 1981 experimenting with the different motifs and modules.

The following 19 brass pattern issues from this "bronze age" series represents an incredible grouping that is split between pieces denominated at 700 Yuan and measuring 33mm, and those at 350 Yuan and 27mm. The "square caldron with human faces" and the "four goats copper pot" ask the question "what if?," while others, such as the "Changxin court lantern," were simply delayed until the release in 1992. Still others, like the "mythical winged creature" type, were passed over in favor of a different design that was ultimately chosen for use. In all, this incredible array presents the first time in which these seemingly unique patterns have been seen by us and represents the only such specimens graded at NGC or PCGS. Their immense rarity cannot be more emphasized, and their importance to the hobby—especially as a look behind the curtain and at the design process during the early years of the modern Chinese commemorative coin program—is abundantly obvious to all who view them.

其他文物形象。中國疆土遼闊,歷史悠久,自然不乏文物瑰寶。此系列構思之初,各項文物的設計提案紛涌而至。當中大部分在1981年的首輪遴選中被淘汰,若干設計在1992年成功發行。我們對這些設計的了解並非來自鑄幣厰記錄或設計草圖,而是1981年爲實驗各種設計形象及模組而製的黃銅試鑄幣。

以下19枚黃銅樣幣均出自《出土文物》系列,按面值 及直徑可分爲兩組:700元、33毫米及350元、27毫米。 部分文物如人面紋方鼎及四羊方尊最終並未發行,一些 設計如長信宮燈於1992年的第三套中亮相,另有設計如 雙翼神獸,形象幾經改版,終被採用。此組樣幣屬我們 首次經手,亦是NGC及PCGS評鑒中絕無僅有的一套。除 罕有程度無可比擬之外,此組樣幣對錢幣收藏亦影響深 遠。透過這19枚樣幣,我們可一窺中國早年紀念幣的設 計過程。

CHINA. Brass 700 Yuan Pattern, 1981. NGC PROOF-68 Ultra Cameo. KM-Unlisted. Diameter: 33mm. Bronze Age Discoveries. Type I. Changxin court lantern. An EXTREMELY RARE and quite possibly UNIQUE pattern issue that emanates from a remarkable series of such patterns that we are offering for the first time. This represents the only such example seen at NGC, with none having been seen at PCGS. This design was ultimately selected for the silver 5 Yuan type struck in 1992 [series 2] (KM-460). Exceptionally vibrant and radiant, this captivating example is largely free of any blemishes—a few lightly scattered spots on the obverse being all that stands in the way of an even higher designation.

CHINA. 15 Ounce Gold Vault Protector Medal, ND (1990). NGC PROOF-69 Ultra Cameo. Cheng-p. 93. Mintage: 99. Struck in the style of the Tang Dynasty. Edge at 6 o'clock engraved #95. Tied with two other examples at this grade for finest certified at NGC. Sharply struck with hard mirrored fields and frosted cameo devices. Includes the case of issue and certificate of authenticity #94. The certificates of authenticity for # 94 and 95 were accidentally switched at the time of distribution.

It is important to note that vault protectors hold a significant place in China's extensive numismatic history being produced for more than 1,000 years. From the beginning these issues were much larger, heavier, thicker and overall better made than the regular circulating Cash coinage. The sole purpose of these massive talismans was to be an offering for the God of wealth and each were hung with red silk and tassels in the mints spirit hall. It was believed that they contained magical powers that would protect the mint while bringing fortune and wealth to the treasury. Typically these were made to commemorate the opening of new casting furnaces to produce regular Cash coins.

CHINA. Ink Chopmarked Dollar, Year 23 (1934). PCGS Genuine—Environmental Damage, AU Details Gold Shield.

L&M-110; K-624; KM-Y-345; WS-0146. Attractively and originally toned with the addition of an unusual stacked rectangular ink chop on the obverse that now shows in an electric purple color, as well as a partial circular black chop on the reverse. While the host Sun Yat-sen Dollar is very common, the growing number of collectors seeking unusual chopmarks should really jump at this opportunity to acquire this intentionally modified piece.

While fading of the ink has hindered full legibility of the obverse chop, a partial interpretation of the characters suggests it was stamped for an opening event, and that it extended the feeling of prosperity and great success to those involved.

A bright and lustrous example displaying light attractive mottled patina with a fairly well applied stamp and a nearly complete character on the reverse, though the characters on the obverse are slightly hidden by the patination. A type the seldom appears on the market sure to pique the interest of many collectors.

Interesting to note that the reverse exhibits the raised character "Jing", this could only occur if the surface in which the silversmith or merchant who applied this stamp used a mould of some sort to place the ingot on so when the obverse stamp was applied metal would be pushed down into the surface in which is sat.

Fantastic 29th Year Gold Tael Pattern Restrike

完美二十九年後鑄戶部庫平一兩金樣幣

52132

(t) CHINA. Gold Tael Pattern (Modern Restrike), Year 29 (1903). NGC PROOF-66 Cameo. L&M-1019; Fr-Unlisted; K-927; cf. Chang Foundation-pg.16 #2; cf. Wenchao-pg.44 #6 (rarity five stars); WS-0001. Plain edge. Struck from original dies. Although a modern restrike from original dies this issue remains incredibly RARE and highly sought after by collectors. This pattern in gold seldom appears on the market in any form and is virtually uncollectable. The strike is needle sharp with intricate frosted devices in stark contrast to the highly reflective mirrored fields. Clearly the dies for these have been heavily polished creating a cameo effect not encountered on originals of this series, but still retain slightly rough surface texture in areas indicative of die rust. The bright yellow golden color catches the attention of those who behold it where the dragon appears to be flying right off the surface of the coin. The obverse is brilliant and free of tone while the reverse displays just a hint of patination that pops out when tilted in the light adding to its pleasing appearance.

Although officially struck at the Tientsin Mint, the original dies were ordered from and prepared by the Osaka Mint in Japan. These issues are known in at least three different metal types including gold, silver and bronze all of which should be considered EXTREMELY RARE and highly sought after. This was done under the supervision of Robert Hart, Inspector General of Maritime Customs. The initial goal was an early attempt to unify Chinese coinage on the gold standard. Denominations were produced in 1 Tael, 5, 2, 1 and 1/2 Mace. The project failed for several reasons and never came to fruition. The project met a great deal of resistance from the directors of the provincial mints as the outlined plan called for one central mint being responsible for coinage production. This was in order to insure the uniformity of the new coinage and would prove to cut into the profits of the provincial directors. Also, at this time there was no plan in place to deal with the vastly different types of paper money circulating in China and how to accept them in exchange.

光緒戶部一兩樣幣原模來自日本大阪造幣局,於海關總稅務司赫德監督下在天津造幣廠製作。最初的目的是統一幣制實施並金本位,面值有一兩、五錢、二錢、一錢及半錢等五種。計畫沒能推行有幾個原因,其中之一是各省反對由中央設置總廠製造規格一致的新幣,因為這樣會影響他們的利益。此外,中國這時候也沒有能力處理大量流通中的各式紙幣及如何兌換的計畫。

This highly flashy restrike offers much brilliance in the fields in stark contrast to the frosted intricate devices. A seldom encountered issue found in any format these pattern only issues are highly coveted by collectors and as such should be considered VERY RARE. Clearly the dies have been meticulously polished creating fresh looking surfaces though upon close inspection areas of roughness, indicative of die rust, can be seen. This very attractive example is sure to see strong bidder participation destined for an advanced collection.

(t) CHINA. Bronze Mace Pattern, Year 29 (1903). Osaka Mint. NGC MS-64 Red Brown. cf. L&M-4; cf. K-930; cf. KM-Pn291; Hsu-4. An unlisted metal type, this piece exhibits a needle sharp strike that clearly defines the most intricate, crisp details and blocked off letters and calligraphy. The smooth clean fields displaying an attractive tawny-red color while hints of brunette hues grace the tops of the devices. A wholly original representative of the type with a great look destine for an advanced collection.

According to Edward Kann, this series was part of a projected currency reform based on the gold standard consisting of 1 Tael, 5 Mace, 3 Mace, 1 Mace and 5 Candareens, but never came to fruition. As the Pei Yang Arsenal was destroyed during the Boxer Rebellion (1900-01) and the new central mint at Tientsin was not in full production until 1904, the Osaka Mint was commissioned to prepare dies and samples of the new proposed coinage. These issues are know in at least three different metal types including gold, silver and bronze all of which should be considered EXTREMELY RARE and highly sought after.

Finest Certified 1907 Pattern Gold K'uping Tael

評級最佳丁未年造大清金幣庫平一兩樣幣

52136

(t) CHINA. Gold K'uping Tael Pattern (Restrike), CD (1907). Tientsin Mint. NGC MS-64. L&M-1024; Fr-2; K-1541; KM-Pn302; Wenchao-pg.49 #11 (rarity four stars); Chang Foundation-pg.26 #7; WS-0009. The single finest certified of the type on either the NGC or PCGS population reports, none finer. A fantastic representative of this seldom encountered and VERY RARE type, this lovely large size gold coin exhibits a bold strike with good definition of the fine details and crisp legends. The smooth surfaces offer much brilliance, but are slightly subdued and very original looking. Close inspection of the fields and devices reveals a slight surface roughness indicative of the restrike nature of this issue using original dies from the Tientsin Mint. Clearly struck in limited quantities, these pattern only issues are highly coveted by collectors commanding strong prices whenever they appear on the market. This near-Gem example is sure to catch the attention of quality conscious collectors with fine cabinets.

Struck on an experimental basis as patterns only and never released into circulation. The plans to issue gold coinage in units of one teal for circulation, unfortunately, never materialized. This was largely due to China's lack of gold reserve combined with the current currency being based on the silver standard. Hence a limited number of pattern Taels were struck in gold.

光緒丁未年造大清金幣庫平一兩樣幣。天津造幣廠。PCGS及NGC中最高分的孤品。具代表性的一枚,鮮少面市,細節出眾,圖文纖毫畢現。光澤幣面,金光若隱若現,原廠品相。仔細檢閱,底版及圖文可見有些粗糙感,應為天津造幣廠的原模用於後鑄時所出現的特徵。鑄額稀少,每次面市成交價均再創新高。GEM品相傑作,世界級珍藏。

沒有發行的試造樣幣。清政府計畫推行一兩為單位的金本位制幣,不幸未能實現。主要是中國當時缺乏黃金儲備,且使用的通貨是以銀為本位。僅試製極少數量的金質樣幣。

Tremendous L. Giorgi Signed 3/4 Facing Yuan Shih-kai Type The So-Called Matte Proof Variety

L. Giorgi 簽名七分臉銀樣幣 俗稱啞光樣幣版

52311

CHINA. Silver Dollar Pattern, Year 3 (1914). NGC Unc Details—Cleaned. L&M-73; K-643a; KM-Pn33; WS-0167; Wenchao-pg. 535#859 (rarity four stars); Shanghai Museum-Mr. Shi Jiagan's collection-pg. 138#634; Sun-III-2-14. Signed by L. Giorgi. A VERY RARE and always desirable pattern type, this example exhibits very little in the way of the noted cleaning and instead displays numerous aspects of die polishing. A great opportunity for an incredibly difficult coin.

Often misunderstood, this issue — which displays the L. Giorgi signature at the lower righthand side of the obverse — was actually struck in two sequences, with the results being easily identifiable varieties. This type, the so-called "matte proof variety", was the first struck, and it exhibits surfaces that are dull with significant heavy die polish lines running through the fields. Likely as a result of its appearance, the dies were then significantly reworked in order to produce a coin with more traditional reflective fields; this issue can be termed the "brilliant proof variety". Upon close study of the two varieties together, one can match some of the die polish lines on both varieties. Also, when comparing Yuan Shih-kai's epaulet near L. Giorgi's signature, its appearance on the matte proof version will always be full, while significant detail is missing on the brilliant variety. It is this detail loss, as well as other more minor instances, that proves the striking sequence for these varieties. One must conclude that in the process of reworking the matte-finished dies to make dies that would produce a reflective coin, the polishing resulted in some detail loss in the dies. Because of this, collectors today can seek both varieties of this elusive type, and marvel at the fact that two coins from the same set of dies can have such a dramatically different appearance.

民國三年袁世凱像壹圓七分臉銀樣幣。 L. Giorgi簽字版樣幣。極罕。淸洗痕跡極不明顯,主爲數處模具經拋光的痕跡。此枚存世稀少,實是將珍品納入襄中的絕佳機會!

此設計於正面右下方的簽名常被誤解,事實上存在兩個主要版別,均由雕刻師 Luigi Giorgi設計。此枚打鑄時間較早,統稱爲"霜面精製版",底版處可見明顯的模具拋光條紋。正因模具自身的瑕疵,後期被改良爲第二版的"鏡面精製版"。仔細檢閱兩款版別,有些拋光線同時出現於兩款的底板上。而且對比袁世凱肩章附近的L. Giorgi簽名,霜面的簽名更爲飽滿完整,而鏡面的一版許多時候均有從缺。正因如此,可以推斷出兩版的先後鑄打順序。在改良霜面模具時,鑄幣廠需要進行打磨的工序,致使設計的部分細節有所缺失。兩版模具相同但幣面卻截然不同,饒有趣味,資深藏家可細味兩版之別,增添收藏之樂。

CHINA. Dollar, ND (1916). PCGS MS-68 Gold Shield. L&M-942; K-663; KM-Y-332; WS-0099. Struck for the inauguration of Hung Hsien (Yuan Shih-kai) as emperor, this popular type features Yuan in full military attire along with a tall plumed shako on the obverse, while the reverse displays an elegant—and rather popular—imperial flying dragon. Seemingly flawless and entirely impeccable, this majestic specimen is clearly destined for the ultimate in advanced Chinese cabinets and offers wholly unrivaled quality, as it is the sole finest example certified across both major services. Clearly superior to small handful of issues at the MS-67 level, such as a PCGS MS-67 that realized a total of \$114,000 in our October 2020 Hong Kong auction (lot 41378). An EXCESSIVELY RARE offering that will most assuredly generate tremendous enthusiasm and interest, and one for which the sky truly is the limit.

One of the finest of the type that has been seen at PCGS, this glistening Gem is exceeded by just seven other examples and presents a razor-sharp strike and nearly blast white surfaces. The radiance is quite captivating and should allow this specimen to soar to a rather lofty level that is RARELY seen for the type.

An incredibly popular and desirable type believed to have been a pattern issue, it now appears that these were, in fact, more medallic in nature, and meant to be given out upon the opening of the Peking Union Medical College (PUMC). CHINA. Dollar, ND (1923). PCGS MS-63 Gold Shield. L&M-959; K-678; Hsu-24; WS-0105. President Tsao Kun in military type. A beautifully struck example of this **SCARCE** and highly sought after type, this exceptionally toned piece radiates with grace and beauty.

Tsao Kun's short presidency began in October 1923, after he openly bribed the National Assembly members with \$5,000 in silver dollars to gain the office. This blatant act of corruption resulted in rival factions turning against him, with Tsao Kun eventually being ousted in a coup led by General Feng Yuxiang in October 1924.

CHINA. Dollar, ND (1924). PCGS MS-68 Gold Shield. L&M-865; K-683; Hsu-25; WS-0107. Tuan Chi Jui type commemorating the "Peaceful Unification" of China. This tremendous example offers such impressively majestic quality that it is nearly impossible to convey its excessive RARITY when encountered so near perfection as is the case here. Fully radiant, extremely lustrous, and attractively toned with hues burnt sienna, sea foam green, and light cobalt, it should come as no surprise that this specimen is the sole finest example of the type certified at either of the two major services, with just two seen at the MS-67 level. A crown that will most assuredly set the record for the type, as the sole NGC MS-67 example—realizing a total of \$53,775—last crossed the auction block nearly a decade prior in our August 2011 Hong Kong auction (lot 70388).

(t) CHINA. Silver "American Design" Dollar Pattern, Year 18 (1929). Hangchow Mint. PCGS SPECIMEN-63 Gold Shield. L&M-95; K-616; KM-Pn100; WS-0139. The American design from the Philadelphia Mint, but struck in China at the Hangchow Mint. This highly attractive and brilliant flashy pattern is always heavily sought after when coming to market, depicting the American rendition of the expressive portrait of Dr. Sun Yat sen. The contrasting surface textures between the devices which are frosty and the fields which exhibit much reflectivity, though the open areas of the reverse are slightly muted from light delicate patina, offer an eye catching appearance sure to grab the attention of many collectors.

In 1929, the Chinese Ministry of Finance ordered a new design for the then proposed Dr. Sun Yat-sen Dollar. Patterns were submitted from the world's five leading mints: Italy, Japan, England, United States and Austria. Upon completion, the various mints shipped the dies as well as samples of the new patterns to China.

A tiny incuse "AAΓ" (in Cyrillic characters) appears at 6 oʻclock on the ring between the dragons and the ornamented border. This and other subtle differences in the design suggest that this piece was from an earlier striking as the Envoy traveled westward. It is known that the Heaton Mint in Birmingham, England also produced these medals. CHINA. China - Germany - Great Britain - Japan - Russia. Siege of Peking Bronze Award Medal, 1900. PCGS SPECIMEN-65 Gold Shield. BHM-3672; Eimer-1842. Weight: 57mm. By J. Tayler Foot in London. Presented to Baron Basil Kroupensky (Василий Николаевич Крупенский). Obverse: MENE, MENE, TEKEL, UPHARSIN / ICHABOD! — from Belshazzar's Feast by Rembrandt, roughly translating as "God hath numbered the days of thy kingdom and hath brought it to an end; thou hath been weighed, and thou art lacking; Alas! The glory hath departed!" [itself a reference to the book of Daniel], female allegories of Germany, wearing mural crown, and Great Britain, wearing Phrygian cap, standing facing one another and clasping hands along with allegory of Japan in background, wearing kimono; at their feet, they tread upon a coiled dragon emblematic of the Qing Empire and the Boxers; Reverse: JUNII XX - AUGUSTI XIV / A D MDCCCC, frontal view of the Qianmen (Zhengyangmen) Gate, under siege and engulfed in a plume of smoke slightly zoomorphized as a snarling dragon; cannon in foreground. VERY RARE and extremely historically important, this glossy Gem medal features chocolate brown surfaces that exude tremendous luster. A relic from the height of the Boxer Rebellion. Includes original box of issue with the recipient's name embossed in gilt foil, along with the title "PEKING SIEGE / 1900."

Struck at the request of Arthur D. Brent, an employee of the Hong Kong & Shanghai Bank, these medals were given to others present during the siege that ensued at the International Legations in Peking (Beijing) during the summer of 1900. A group of Europeans, Japanese, and Christian Chinese took refuge within the Legation Quarter as the forces of the Boxers and Qing Empire laid siege for 55 days—the siege ultimately broken by a joint international effort that marched from the coast. One such member present within the complex was Basil Kroupensky, a Russian diplomat who was in the middle of his stint as 1st Secretary of the Russian delegation in Peking. He would also serve in similar positions as the Russian ambassador to the United States, the Republic of China, and Japan.

The obverse legend is a reference to an inscription illuminated in the paining by Rembrandt entitled Balshazzar's Feast. On the wall, the Hebrew phrase that is transliterated on the medal became an English expression used for foreshadowing impending doom. The phrase "the writing is on the wall" retains the general meaning of the concept, the idea that one's fate has been sealed. In the context of the medal, the glory and good times enjoyed by Europeans within the legation had seemingly come to an ominous end at the hands of the Chinese beyond their walls.

1900年圍攻北京銅樣勳章。 57mm。J. Taylor Foot 鑄於倫敦。呈送俄國駐華公使庫朋斯齊男爵 (MENE, MENE, TEKEL, UPHARSIN / ICHABOD!)。正面"MENE, MENE, TEKEL, UPHARSIN / ICHABOD!"出自倫勃朗的《伯沙薩王的盛宴》,意為"汝邦氣數已盡,即將覆亡,此乃神旨。汝之所爲俱已为度,有所虧。嗚呼!榮光已逝!"[此句原本出自《但以理書》] 章上刻畫三名女性形象:頭戴花冠的是德國與頭戴自由之帽的英國執手相對,背後爲身穿和服的日本。三名女性赤脚踩於象徵大清帝國及義和團的捲曲龍身之上。反面刻有"JUNII XX - AUGUSTI XIV / A D MDCCCC",描繪被燒毀的前門 (正陽門),濃煙形狀似是龍在咆哮,門前有一大炮。非常罕見,極具歷史價值的一枚紀念章。Gem 品相,巧克力棕色表面光澤流麗。義和團運動巔峰時期的遺物。附原盒,盒上受勛人的名稱用箔紙壓印,有標題"PEKING SIEGE / 1900"。此紀念章應香港上海滙豐銀行職員 Arthur D. Brent 要求而製,贈予 1900 年夏季八國聯軍之役的在場人士。在被義和團及大清朝帝國圍攻的 55 天内,歐洲、日本及中國基督教徒藏匿於東交民巷中。攻勢最終在八國聯軍登岸後被瓦解。俄羅斯外交官瓦西里-庫朋斯齊,時任俄羅斯駐華公使,當時亦身陷困境。其後來亦擔任駐美國、中華民國及日本的大使。正面銘文引用倫勃朗的畫作《伯沙薩王的盛宴》。寫於墻上的希伯來文在章上音譯爲英文,預示即將到來的厄運。英語中"the writing is on the wall"(寫於墻上)有厄運臨頭,難逃一劫的含義。在此章上可被理解爲,歐洲使者所享受的榮耀與歡樂時光即將被忍無可忍的中國人畫上句號。

CHINA. Nye Sze Chung Silver Medallic 50 Cents, Year 9 (1920). PCGS MS-63 Gold Shield. LM-954; KMX-995. Featuring the military bust of General Nye Sze Chung, this medallic issue at the module of 50 Cents presents some steely gray brilliance and a subtle tone. Quite RARELY encountered, it is just a point short of our most recently offered example of the type, a PCGS MS-64 in our May 2020 Hong Kong auction (lot 41679), which sold for a total of \$30,000 and exhibited a somewhat mottled nature to the toning. A great opportunity for a fantastically difficult piece with an awesome pedigree.

CHINA. China - France - Japan. "Closing of the French Legation at Beijing" Engraved Gold Medal, 1943. ALMOST UNCIRCULATED. Diameter: 34mm; Weight: 21.82 gms. All elements engraved. Obverse: "QUARTIER DIPLOMATIQUE / PEKIN / 1900-1943 / GONE WITH THE WIND" in four lines; ornate cross above and below middle two lines; semi-circular border of stylized bats above; Reverse: Frontal view of the Temple of Heaven. *Edge*: 18K hallmark, along with a vertical test mark. Quite brilliant from the fields being cleaned, a rather INCREDIBLY RARE and quite possibly UNIQUE relic from the WWII geo-political climate in Beijing.

Following the upheaval emanating from the Boxer Rebellion in 1900, most of the buildings located in the legation quarter of Beijing (then styled in the west as "Peking") were severely damaged or outright destroyed. The French had originally established their legation (a representative office of similar nature to an embassy, though lower in status) in 1861, with this medal likely pointing to a re-establishment in the post-rebellion period in 1900. This legation quarter was rather bustling in the years that followed, with numerous foreign outposts in operation. Japan began their imperialist move into China with an advancement upon Manchuria in 1931, with increased aggression in that sphere paralleling the increased turmoil posed by Hitler's Germany in Europe. As World War II continued to rage, the inhabitants within the legation quarter were placed under greater threat, ultimately causing their evacuation—likely the cause for the issuance of this medal. The addition of the phrase 'gone with the wind' appears to be a nod to Margaret Mitchell's book—still a cultural phenomenon following the release of the cinematic interpretation in 1939—and a lamentation over an end to the period of harmony that largely existed for westerners in the interwar years at the quarter.

1943年中法日撤離北京法國使館雕刻金章。 34 mm; 21.82 克。所有元素均爲雕刻。正面四行銘文 "QUARTIER DIPLOMATIQUE / PEKIN / 1900-1943 / GONE WITH THE WIND",花飾跨越上及中下兩行,半圓蝙蝠邊框於頂部。反面爲天壇正面圖。邊緣有 18K 標記及垂直測記。底版因經淸洗而顯得亮麗。極罕有,甚至可能是獨一無二的金章。再現二戰地緣政治氛圍下的北京。

1900年義和團運動中,北京東郊民巷大使館區的建築多被嚴重破壞甚至摧毀。法國使館原建立於 1861年(職能與大使館接近,但職位較低)。此章應是描繪 1900年義和團運動後重建的建築。大使館區於隨後數年都頗爲繁忙,數國使館都在重建。日本軍國主義崛起,1931年入侵中國關東。其侵略在東亞圈造成的動蕩與德國希特勒在歐洲引起的風暴相差無幾。二戰日漸激烈,東郊民巷的居民亦在戰爭陰霾之下,最終被撤僑。這或是此章的鑄造原因。銘文 "gone with the wind" (隨風飄逝) 似是向瑪格麗特・米契爾致敬。其著作《飄》在1939年改編成電影後,成爲文化潮流。銘文同時亦在感嘆,戰爭期間東郊民巷西方居民的和諧共處不復存在。

CHINA. Lady & Peacock Copper Medal, Year 33 (1944). NGC Unc Details—Holed. YCM-48. Obverse: Facing figure, peripheral legend around; Reverse: peacock. Sharply detailed with surfaces that are a pleasing brown color with traces of original mint red within some the protected designs on both sides. A neatly placed hole near the edge at 12 o'clock necessitates the "Details" designation, however it does not interfere with any focal designs, and thus is only a minor impediment to the appearance. RARE.

民國三十三年白母马太夫人九秩荣寿纪念銅章。 正面肖像,銘文環繞。反面為孔雀開屏圖。幣面銳打,棕色包漿,原廠紅銅光兩面透現。12點鐘位置有一小孔,致得細節評分。不過對主設計毫無影響,只為小瑕疵。**罕見**。

Lovely Year 24 Anhwei Dollar

(t) CHINA. Anhwei. 7 Mace 2 Candareens (Dollar), Year 24 (1898). PCGS MS-64 Gold Shield. L&M-203; K-53; KM-Y-45.5; WS-1080. Variety with large rosettes and flat "Si" with rounded characters in the date. Tied for finest certified of the variety with two other example on the PCGS population report. This particularly attractive example boasts a strong full strike, smooth satiny surfaces and lovely cartwheel luster displaying eye catching rich mottled patination of lavender, lilac, cobalt and mid-night blue offering much originality. The pleasing appearance of this piece is indicative of prolonged storage under the right conditions clearly being plucked from circulation early on. Most issues from this province are usually heavily circulated, many with signs of maltreatment such as chopmarks or other mutilation, and as such the present survivor should be considered VERY RARE and highly desirable; especially so in this state of preservation. By and far, a vastly superior example than normally encountered certain to catch the attention of many collectors with discerning tastes destined for a fine numismatic cabinet.

光緒二十四年安徽省造七錢二分銀幣。大花,平四,日期字體較圓潤。在NGC和PCGS的評級中,以此拍品評級爲最佳,僅有另外兩枚與其持平。鑄打完整有力,緞面幣面絲滑,帶車輪光。引人注目的醇厚點狀包漿,呈薰衣草紫、丁香紫、鈷藍色、夜空藍。原始度高。外觀令人傾心,顯然經長時間悉心靜置於合適的環境中。此版大多有嚴重的流通痕跡,甚至經認爲損傷如戳記或其他損害。因此此枚可説是非常罕有,品相難得一遇,遠超以往所見的同版幣。位屬頂尖集藏的一枚,定能吸引資深藏家爲其千金一擲。

(t) CHINA. Anhwei. Mint Error — Full Reverse Brockage — 10 Cash, ND (ca. 1902-06). NGC MS-62 Brown. cf. CL-AH.45 (for type); cf. KM-Y-38b.1 (for type). Confusingly, NGC has labelled this as an "Obverse Brockage" when it is the character side which shows here. Without the dragon side, we are unable to give an exact attribution of variety although the rosette appears to match Woodward "Obverse K" (seen on CL-AH.43 through -51), though the shape of the up-stroke of "Sheng" differs slightly. Smooth and unmarked, this example merits the Mint State grade given here.

This interesting copper issue exhibits boldly struck devices with crisp design features making variety attribution easy for the trained eye, though the reverse does show a bit of weakness at the denomination mentioned for accuracy. This near-Gem survivor displays lovely smooth chocolate brown patina with an iridescent sheen that pops out when tilted in the light offering much originality and is quite pleasing in appearance.

It is worth noting that the obverse die (dragon side) is seen quite frequently when encountering this issue (Woodward Reverse[obverse] 3), the reverse (character side) on the other hand normally appears with CL-ZJ.20 where the tip of the dragons tail nearly touches the pointed feature of the design at 6 below the central pearl.

CHINA. Hunan. Dollar, Year 11 (1922). PCGS MS-64 Gold Shield. L&M-867; K-763; KM-Y-404; WS-0930. "Hunan Provincial Constitution." Struck to commemorate the Promulgation of the Constitution. Incredibly alluring and pleasing, this decided near-Gem presents a blazingly sharp strike along with some light steely gray toning and a tremendous array of shimmering brilliance. A true connoisseur's piece with staggering, unending eye appeal.

In a time of presidents and warlords, the people simply wanted to unite but also to have autonomy in their own provinces. Zhao Hengxi, the governor of Hunan, wanted to protect the province from civil war, so he worked diligently to establish the Provincial Constitution, finally being successful on January 1, 1922. The constitution, which contained 141 articles grouped under 13 chapters, stated the difference between the central and local governments. Some of the weaker warlords supported these new terms, as they acted somewhat like a talisman—offering those weaker protection against those more powerful in that no other provincial army could enter another without permission. Consequently, several southern provinces followed suit and successfully drafted and instituted their own constitutions.

CHINA. Hupeh. Tael, Year 30 (1904). NGC AU Details—Rim Damage, Cleaned. L&M-180; K-933; KM-Y-128.2; WS-0878. Small Characters variety. Despite the noted cleaning and scattered rim bruises, this impressive example exhibits little in the way of handling and is always desirable no matter the state of preservation.

648,000 Hupeh Taels were originally minted, inclusive of both large and small character types; however, it is unknown exactly how many of each were struck. This Tael was introduced as part of a projected coinage reform based upon the traditional Chinese weight standard rather than the Dollar system. In the initial proposal to produce these coins, it was also suggested to produce smaller denominations in the values of 1, 2, and 5 Mace. However, no such pieces have surfaced (even in pattern form), and it is unlikely they were ever produced. The general populace found it complicated to convert two distinctly different coinage systems, especially when making change. A Hupeh Tael housed in the British Museum supports this by showing evidence of cutting to make change. This specimen is essentially mint state with a large pie shape section cut from the coin. The cut is in a similar manner to the "broken dollars" picture on pg. 121 figure 4.10 of Joe Cribb's reference Money in the Bank. This short-lived series circulated for only a brief period and was soon after replaced by the unified "Tai Ching Ti Kuo" silver coinage. Although the Hupeh Tael coinage has a fairly large mintage, most were likely melted down to be made into later coinage. It is interesting to note that these Taels were struck in 0.877 fine silver, as opposed to the 0.960 fine silver set forth by the currency regulations of 1905.

Highly Important 7.2 Candareens Reversed Legends Pattern

非常稀少的反版七分二釐銀樣幣

53277

(t) CHINA. Kwangtung. 7.2 Candareens (10 Cents), ND (1890-1908). PCGS MS-62 Gold Shield. L&M-131; K-24; KM-Y-195.1; WS-0939. The only example of the type graded in the PCGS census, this shimmering, nearly-choice minor presents tremendous radiance and shimmering brilliance, along with an exquisite strike. An ultimate, crowning achievement for the most advanced collections of early-modern Chinese issues.

Upon the realization that the first Kwangtung issues were being gathered from circulation and melted for their extra silver content, authorities quickly ordered a modification to the new coinage design. New patterns were produced at the Kwangtung Mint using hubs supplied by the Birmingham Mint. Essentially these were identical to Allan Wyon's original design, with a few modifications. The weight was changed from 7 Mace 3 Candareens on the Dollar to 7 Mace 2 Candareens and correspondingly smaller per denomination. Another subtle change that was made, but only on some denominations, was the addition of small rosettes at either side of the dragon.

Upon further inspection of the dollar from this series one notices the stylized "2" used in the metal content. This suggests this series being prepared by a Chinese die engraver as it is consistent in style to the latter dollars of this series. The strike quality of this type is slightly inferior to that of the "Seven Three" set. This would be consistent with the fact that although the Kwangtung Mint had received the proper machinery and dies, it did not receive proof presses or the proper machinery to produce special planchets.

Like the "Seven Three" coinage, this new modified design was destined for failure. The overall design failed to meet with the approval of the Peking authorities due to the placement of the Chinese and English legends. The mint was then instructed to shift the English and Chinese text to the opposite sides of the coins. For this reason this type has come to be known as the "Reversed Pattern" series.

Much more RARE than the first type as it was struck in a much smaller quantity and apparently never released for circulation. Very elusive and missing from most major collections. Highly important as this type represents a landmark in Chinese minting as it is the first Specimen silver coinage produced in China with modern minting machinery.

廣東省造光緒元寶七分二釐銀樣幣。七二反版龍。 PCGS 評鑒中的唯一一枚。熠熠生輝的近完美品相,鑄打極深。現代中國早期錢幣中的無冕之王,就算是身處最資深的集藏亦毫不遜色。

在得知所流通的初版被熔毀以提取銀料後,廣東當局迅即下令新版設計需做出調整。新樣幣由廣東錢局用伯明翰造幣廠提供的母模鑄造。設計大致與艾倫偉恩(Allan Wyon)原作相同,但作出了數處變更。壹圓的重量由七錢三分減爲七錢二分,其餘面值依序遞減。部分面值中,蟠龍兩側各添加一個花星。

仔細檢視此系列中的壹圓,可見花體"2"。其風格與此系列中的後續錢幣一致,由此可見是由中國模具雕刻師所製。鑄工稍遜七三版。此亦符合史實,因爲儘管廣東錢局收到正確的器材及模具,該局並未獲樣版模壓或生產特製坯餅的正確器械。 就如七三系列,此新設計注定胎死腹中。主要原因爲中英銘文的排列方式與北京當局體制不合。造幣廠按指示將中英銘文改至錢幣的另一面。此版亦因此被稱爲"反版"。

遠較初版**罕見**,鑄額更少,最終並未發行。大型集藏中亦從缺的一版。此版是中國首枚以現代鑄幣技術造出的銀樣幣,是中國鑄幣中的里程碑,因此意義重大。

(t) CHINA. Kwangtung. Brass Cash Pattern, ND (ca. 1890-1908). PCGS SPECIMEN-62 Gold Shield. CCC-779; Duan-2235. This interesting and perplexing issue is certain to grab the attention of the specialist looking to advance their collection by acquiring rare and unusual numismatics treasures. The obverse features the standard design with the formula for the Emperor's name while the reverse is what really sets it apart from other issues. The Manchu script on the reverse is somewhat barbarous done by an inexperienced and unfamiliar hand that succeeded in engraving a nonsensical version of "Guwang". Two dots are also noticed on the reverse, a feature not normally associated with square hole Cash. The surfaces are quite lovely displaying attractive mottled light golden brown brassy tone with areas of richer coloration and a slight iridescent sheen that pops out when tilted in the light offering much reflectivity. A neat and seldom encountered issue destined for an advanced collection of Chinese numismatics. Although displaying the same grade on the holder as the one we sold in October (SBP HK, lot 42297), the present example is much more pleasing to the eye.

An interesting pattern whose exact origin is unknown. It was certainly not manufactured in China but most likely produced in Europe. The fact that this elusive issue is not listed in many of the reference material is suggestive of limited production. Though stylistically a much different product than the Paris mint patterns (CCC-777), where the characters are larger and more bubbly, this issue also differs from the patterns produced by the Heaton mint in Birmingham (first Kwangtung dragon issues). Due to the lack of contemporary documentation, there is no solid evidence as to the place of manufacture.

廣東省造光緒通寶一文黃銅樣幣。趣味盎然的版別,定能引來專家關注。將此稀少塊寶納入囊中的良機。正面爲標準設計,鑄有帝號。反面則不同尋常。反面滿文較粗獷,出自青澀之手,刻出不成形的"廣"字。還有兩個方孔錢上少見的圓點。幣面有淺金棕黃銅色點狀包漿,部分位置色澤更深。燈光下轉動可見虹彩,百看不厭。精美的稀有版別,必能獲得資深中國錢幣藏家青睞。儘管於十月香港拍賣中有一枚同分(編號 42297),但此品相遠勝該枚。出處不明的樣幣,別緻有趣。定非鑄於中國,或是於歐洲製造。許多參考書籍中都未有收錄此版,側面説明其鑄額之少。此枚與巴黎造幣廠出產的樣幣(CCC-777)風格多有不同,巴黎鑄品字體較大及圓鼓。其與伯明翰喜敦造幣廠的樣幣版式(初版廣東龍銀)亦大相徑庭。由於缺乏文獻,其出處的實質證據從缺。

CHINA. Kweichow. 20 Cents, Year 38 (1949). PCGS Genuine—Edge Repaired, EF Details Gold Shield. L&M-616; K-758lll; KM-Y-430; WS-1116. An interesting subsidiary coinage from a province that didn't produce many coins during the late 19th to mid-20th centuries, the present piece, like other issues from this region is somewhat crude with an uneven strike and loss of definition of the design features near the rims. Unfortunately, the edge does exhibit light file marks as indicated on the PCGS insert as "Edge Repaired", but is somewhat obscured by the grommet holding the coin. Despite its shortcomings a presentable example of the type displaying light attractive slate patina with lighter gray in the open areas and atop of the devices.

It is interesting to note that this issuance has at least two different die pairings, but does not appear to mix dies between the two sets. The two obverse dies appear to have been hubbed and are nearly identical save for a few minor details caused from degradation which sets them apart. The reverses on the other hand are distinctly different, each exhibiting characteristics that make classification fairly easy. The two most obvious die markers are severe die rust showing evidence of clashed dies coupled with thinner character strokes while the other die, such as the present example exhibit smoother surfaces and thicker character strokes. Surely an issue worthy of further in depth research from the specialist certain to catch the attention of serious academics actively searching out variations to add to their collections.

民國三十八年貴州省造廿分銀幣。 貴州省於19世紀末至20世紀中期並未出產很多錢幣,而本拍品便是其中一枚珍貴又有趣的小輔幣。正如貴州所造的其它錢幣一樣,本幣鑄造有些粗糙不均,靠近邊齒處的設計細節弱打。PCGS標明"邊緣修復",我們確有觀察到邊齒有一小處填充痕跡,但在幣盒結構的遮掩下不甚明顯。瑕不掩瑜,依然不失賞心悅目,底版和圖文高處閃現迷人淺灰光澤。

有趣的是,本發行至少有兩對不同的正反模具,但並沒有交叉 組成混合模。兩個正面模具幾乎完全相同,僅有因磨損位置 不同而造成的細微差別。兩款反面卻截然不同,有許多明顯差 異。其中一款顯示出嚴重的模具鏽蝕,文字筆觸較細;另一款 模具則表面較爲光滑,文字筆觸較粗,本拍品便是例子。這無 疑是值得專家進一步深入研究的問題,也一定會引起嚴肅學者 的注意。版別藏家臻選。

Obverse: "Xian feng liu nian shang hai xian hao shang yu sen sheng zu wen yin bing" (Xianfeng era 6th year, Shanghai county, Banker: Yu Sendsheng, pure fine silver cake); Reverse: "Zhu yuan yu jian qing cao ping shi zhong yi liang yun jiang feng nian zao" (Assayer by Zhu Yuanyu, actual weight 1 ounce [Tael] on the Shanghai scale, made by silversmith Feng Nian). A nicely preserved and attractive survivor, this highly desirable type seldom appears on the market let alone baring the inscription of a VERY RARE issuer. The obverse exhibits a somewhat uneven strike with a slight weakness in the two upper left characters and corresponding flatness on the reverse, though all are readable. The calligraphy is well-made with deliberate and neatly engraved strokes in similar style to those found on the Yunnan pack-saddle Sycee ingots. The surfaces show light signs of handling consistent for the grade displaying lovely mottled gray patina with richer coloration in the protected areas offering much originality. An always in demand type that is pleasing to the eye sure to catch the attention of advanced collectors seeking tough to locate issues to expand their numismatic holdings.

The Shanghai series represents the first Tael coinage produced in China and is of extreme historical significance. Hyper-inflation caused by the Tai Ping Rebellion led to the hoarding of silver. At this time, foreign coins, namely Spanish 8 Reales circulated in Shanghai at a considerable premium. In 1856, the Shanghai authorities authorized silversmiths to issue coinage in an attempt to replace the Spanish 8 Reales. The firms Wong Yung Sheng, Ching Chee and Yu Shen Sheng were granted permission to issue coinage in the denominations of one Tael and 5 Mace. This was a short lived coinage as the monthly output was only about 3000 pieces and was not large enough to meet demand. This combined with the large number of forgeries entering circulation doomed the project to a short period of only about six months.

上海系列爲中國生產的首個壹兩錢幣,極具歷史意義。太平起義導致物價飛升,造成白銀囤積。當時上海地區通行之西班牙本洋銀元兌價高漲。1856年上海道委託王永盛、經正記及郁森盛三家商號鑄造壹兩與五錢銀餅以抵制本洋。但因每月只能生產三千枚,遠不足敷用。加上大量仿造僞品橫行,使這一幣種僅流通半年左右便告結束。

(t) CHINA. Sinkiang. Sar (Tael), AH 1325 (1907). PCGS Genuine—Environmental Damage, VF Details Gold Shield. L&M-744; K-1120; KM-Y-26. A presentable example of this popular crude large-size silver issue with a decent strike and even wear displaying mottled gray tone with minor debris on the rims. The details designation of "Environmental Damage" is due to the said debris and surface porosity on the reverse. Despite its shortcomings a decent example great for the collector on a budget sure to be a welcome addition to the next collection it enters.

CHINA. Sinkiang. 5 Mace (Miscals), AH 1328 (1910). PCGS MS-61 Gold Shield. L&M-755: K-1136; KM-Y-27; WS-1239. Wang-E72-3. The single second finest certified of the date on the PCGS population report with only one finer (MS-62). Because of the crude nature of this series Sinkiang coinage is incredible RARE in this high state of preservation. This somewhat flashy survivor exhibits bold well defined central motifs with a bit of unevenness due to a small straight planchet clip at 12 o'clock on the obverse. This lovely silver minor displays attractive light gray tone with a fair amount of original mint bloom remaining in the protected areas that pops out when tilted in the light. A real treat for the specialist certain to see spirited bidding from many collectors, the chance to acquire such a high grade example of this type seldom occur, and as such serious consideration should be taken by potential bidders.

喀什造宣統元寶伍錢銀幣。屬同年款中PCGS第二高分,僅有一枚更高分(MS 62)。新疆錢幣鑄打較粗,因而保存完好如斯者極其珍罕。本幣表面閃出些許光澤,中心圖案清晰完好,正面12點方向由於坯餅小缺而有些許不平。趣味橫生的銀輔幣,淺灰色悅目包漿,在燈下旋轉時,底版稍透絲微原光。定能成爲有心藏家的心頭之好,引發激烈競投。

This nicely preserved example exhibits strong central motifs, though the outer designs shows signs of an uneven strike. (t) CHINA. Sinkiang. 5 Mace (Miscals), AH 1332 (1914). PCGS EF-40 Gold Shield. L&M-770/771. Mule. Evenly presented with pale tone over surfaces that have avoided all forms of heavy contact. A VERY SCARCE issue that is determined by the rendering of the TY which is aligned on the crossed flags and the rosette (instead of a dot) in the center on the Chinese character side.

While labeled as a mule between L&M-770 and L&M-711, this issue isn't a pure mule of the types illustrated in L&M. While there is a central rosette like L&M-771 on this coin, the floral arrangement around the legends is quite different, making this piece somewhat of a hybrid type.

Softly struck in the centers with considerable luster. A die cud at 5 o'clock has broken away the bottom of the word "CASH". This lovely survivor is quite nice for the issue, vastly superior to most encountered with much remaining luster and a decent strike. Both sides exhibit areas of natural planchet roughness due to lack of die pressure to fully impress the design features, but with good definition of the devices otherwise. The reverse does exhibit a thin planchet crack in the flat area, but is hardly a distraction for this piece. The rich mottled brassy patina coupled with the lustrous surfaces offer much of what collectors could ask for from this series sure to see spirited bidding from keen numismatists.

CHINA. Szechuan-Tibet. Rupee, (1939-42). PCGS Genuine—Planchet Flaw, Unc Details Gold Shield. L&M-359; K-589; KM-Y-3.3. This wholly original looking survivor offers bold details with strong mint luster that's slightly subdued by the rich mottled patination and minor earthen deposits adding to it pleasing organic appearance. The details designation is due to a small planchet crack at 1 on the obverse mentioned for accuracy, but is hard a distraction considering the high grade nature of this piece. Despite its shortcomings a highly attractive example of this normally wellworn and crude series of issues with a good look certain to catch the attention even the most advanced collectors.

四川盧比銀幣。原始品相,圖文深峻,原廠光澤強勁,點狀包漿醇厚,微有積土。正面一點鐘防綫有微小坯餅開裂痕跡,因而得細節評分,但並不礙眼,屬高分品相。此版常見磨損較嚴重,鑄打粗糙。以此枚的品相,必能吸引資深藏家競投。

(t) CHINA. Taiwan. Gold Off-Metal 5 Yuan, Year 62 (1973). PCGS SP Genuine—Rim Repaired, Unc Details Gold Shield. L&M-1106; KM-Pn65. An interesting issue normally struck in copper-nickel seldom appearing on the market in this gold off-metal striking exhibiting a bold motif with lovely satiny surfaces and nice cartwheel luster. Several small faint scratches on the reverse rim appear to account for the details designation of "Rim Repaired", but are hardly a distraction, though a thin pin scratch on the reverse is also noticed mentioned for accuracy. Despite its shortcomings this intriguing issue offers a pleasing appearance displaying a thin veneer of tone adding to its originality and eye appeal sure to add depth to the next collection it enters.

CHINA. Tibet. Sho, ND (1910). PCGS AU-58 Gold Shield. L&M-653; K-1478; KM-Y-5; WS-0234. Tied for third finest certified with three other examples on the PCGS population report, only three finer (MS 62[2] and MS 64[1]). Quite the difficult issue to find problem free let alone in this high state of preservation, the typical crude manufacture with shallow die engraving and uneven striking usually give the appearance of significant circulation. This lovely minor silver coin exhibits a decent strike for this type displaying lovely soft gray patina with areas of richer coloration adding to its pleasing appearance sure to be a welcome addition to the next collection it enters.

A superb example of this popular and highly elusive issue, featuring minimal tone over the surfaces and designs that are boldly and evenly struck. Perhaps conservatively graded, the only appearance of possible friction appears on the lion, and the fields remain free from marks with an exceptional frostywhite appearance. Although not the finest graded example seen, a coin that deserves placement among the finest seen, as the qualities on display often go unmatched on even higher graded specimens.

The spots removed are visible now as tiny, greenish patches, nearly all of them on the reverse, and they do little to detract from the beauty of the coin as a whole.

CHINA. Northern Song Dynasty. 10 Cash, ND (1102-06). Hui Zong (Chong Ning). NGC Genuine. Hartill-16.401. Obverse: "Chong Ning tong bao;" Reverse: Plain. Very well produced for the issue with original surfaces. A must-have for any collector of ancient Chinese coins.

The penultimate ruler of the Northern Song dynasty before its flight and reestablishment in the south, Emperor Huizong reigned for the first quarter of the 12th century, from 1100 until his abdication in favor of his eldest son, Emperor Qinzong, in 1126. During his reign, the Northern Song reached its territorial zenith, bordering the Dai Viet and Dali to the south, the Tibetans and Western Xia to the west, and the Liao to the north. In spite of possessing a vast realm, Emperor Huizong proved to be a rather ineffective ruler, spending much of his time as a patron of the arts rather than overseeing state affairs. Poetry, music, and paintings were all given great attention by the emperor, as well as something for which he was widely known-calligraphy.

Throughout much of Chinese numismatics and until the very end of the end of the empire, coinage took a very formulaic approach, with much of the vast output taking the form of cast-usually in bronzecoins known as "cash." These simplistic pieces generally had square openings at the center allowing for multiples-often in groups of 100-to be strung together for ease of accounting and trade. Four characters would generally occupy the four corners of the obverse, with the reverse usually remaining blank. While these characters featured varying styles of script, Emperor Huizong's noted skills in calligraphy demanded that he offer his input and artistry. During the early portion of his reign (1102-1106), a series of mostly 10 Cash denominated issues employed his own personal calligraphic style, known as the "shou jīn" (slender gold) script. This iconic writing was admired for its "iron strokes" and "silver hooks," presenting a forceful yet elegant overall appearance. Contemporaneous with these "slender gold" issues was a series featuring the rather ubiquitous "seal script," whereby the characters took upon a softer, far less jagged look, with many perpendicular and parallel lines. This form of script also presents a degree of elegance through its seemingly malleable approach.

Despite the direction and overall stability of the Northern Song dynasty during the reign of Emperor Huizong, the cash coins from this period offer a glimpse into his desire for elegance and artistry, and an overall push toward the aesthetic. This numismatic beauty can be seen as camouflaging the political roiling which was taking place and ultimately caused the shrinking and forced moving of the Northern Song to simply the dynasty's portion in the south.

北宋崇寧通寶折十。 正面爲"崇寧通寶";反面光滑。此版別而 言做工精細,原始幣面。中國古錢收藏中不可或缺的一枚。

北宋南遷前的倒數第二位皇帝,徽宗於1100年即位,1126年退 位讓賢給長子趙桓,是爲欽宗。在位期間,北宋版圖達致巔 峰,南至大越及大理,西觸吐蕃及西夏,北及遼。儘管地域廣 闊,徽宗並不是一名合格的統治者。他對藝術的熱枕遠超於管 理國事。宋徽宗酷愛詩詞歌賦,書法造詣更是爲人稱道,瘦金 體便是由他所創。直至淸朝覆沒,中國貨幣的形式大多雷同, 通常都是澆鑄而製的帶孔黃銅錢幣,俗稱"銅錢"。中央孔通常 呈方形,可用繩索串起多至一百枚,以方便交易及算賬。正面 四角各有一漢字,反面則爲空白。正面字體多樣化,徽宗因其 書法技藝高超,在其早期統治下(1102-1106),大部分十文上 書其獨創的瘦金體。此書法以鐵劃銀鈎著稱,字形蒼勁典雅。 除瘦金體外,篆書亦是銅錢字體常客。與瘦金體相反,篆書以 柔和圓潤、結構均匀聞名,但同樣極具美感。儘管徽宗治下的 宋國政局動蕩,最終被迫瑟縮北方,但其銅錢卻展現出其對藝 術的追求,並促使銅錢設計向美學邁進,爲其政治管理上的失 敗略掩一二。

In spite of possessing a vast realm, Emperor Huizong proved to be a rather ineffective ruler, spending much of his time as a patron of the arts rather than overseeing state affairs. Poetry, music, and paintings were all given great attention by the emperor, as well as something for which he was widely known-calligraphy.

Throughout much of Chinese numismatics and until the very end of the end of the empire, coinage took a very formulaic approach, with much of the vast output taking the form of cast-usually in bronzecoins known as "cash." These simplistic pieces generally had square openings at the center allowing for multiples-often in groups of 100-to be strung together for ease of accounting and trade. Four characters would generally occupy the four corners of the obverse, with the reverse usually remaining blank. While these characters featured varying styles of script, Emperor Huizong's noted skills in calligraphy demanded that he offer his input and artistry. During the early portion of his reign (1102-1106), a series of mostly 10 Cash denominated issues employed his own personal calligraphic style, known as the "shou jīn" (slender gold) script. This iconic writing was admired for its "iron strokes" and "silver hooks," presenting a forceful yet elegant overall appearance. Contemporaneous with these "slender gold" issues was a series featuring the rather ubiquitous "seal script," whereby the characters took upon a softer, far less jagged look, with many perpendicular and parallel lines. This form of script also presents a degree of elegance through its seemingly malleable approach.

Despite the direction and overall stability of the Northern Song dynasty during the reign of Emperor Huizong, the cash coins from this period offer a glimpse into his desire for elegance and artistry, and an overall push toward the aesthetic. This numismatic beauty can be seen as camouflaging the political roiling which was taking place and ultimately caused the shrinking and forced moving of the Northern Song to simply the dynasty's portion in the south.

宋代古錢一組。十枚。 大字、短足"寶"。大部分有厚厚一層 塵狀包漿,呈綠色至深藍色,有深色色塊,但字樣深峻淸晰。 **現況出售,概不退換。**北宋南遷前的倒數第二位皇帝,徽宗於 1100年即位,1126年退位讓賢給長子趙桓,是爲欽宗。在位期 間,北宋版圖達致巔峰,南至大越及大理,西觸吐蕃及西夏, 北及遼。儘管地域廣闊,徽宗並不是一名合格的統治者。他對 藝術的熱枕遠超於管理國事。宋徽宗酷愛詩詞歌賦,書法造詣 更是爲人稱道,瘦金體便是由他所創。直至淸朝覆沒,中國貨 幣的形式大多雷同,通常都是澆鑄而製的帶孔黃銅錢幣,俗稱" 銅錢"。中央孔通常呈方形,可用繩索串起多至一百枚,以方便 交易及算賬。正面四角各有一漢字,反面則爲空白。正面字體 多樣化,徽宗因其書法技藝高超,在其早期統治下(1102-1106) ,大部分十文上書其獨創的瘦金體。此書法以"鐵劃銀鈎"著 稱,字形蒼勁典雅。除瘦金體外,篆書亦是銅錢字體常客。與 瘦金體相反,篆書以柔和圓潤、結構均匀聞名,但同樣極具美 感。儘管徽宗治下的宋國政局動蕩,最終被迫瑟縮北方,但其 銅錢卻展現出其對藝術的追求,並促使銅錢設計向美學邁進, 爲其政治管理上的失敗略掩一二。

An attractive and wholesome survivor exhibiting signs of handling consistent for the grade with even wear, smooth rims and naturally rough surface texture in the protected areas displaying lovely brassy tone and richer coloration in the fields and crevasses.

Hartill states that this series of issues were originally manufactured barring the name of Emperor Kangxi and could be arranged to form a four line poem that rhymes following the form traditional Chinese poetry. He goes on the cite Schjoth "If genuine and placed together, they have the power of expelling evil influences and of preventing fires. Their genuineness according to popular belief can be tested by placing them, when strung together, on the top of a Chicken-coop: if genuine, they will prevent the cocks from crowing in the morning." Clearly there many renditions of these poem coins were manufactured throughout the remainder of the Qing dynasty barring various Imperial names.

(t) CHINA. Mint Error — Partial Brockage Obverse — 10 Cash, ND (1920). PCGS VF-35 Brown Gold Shield. cf. CL-HUN.71; KM-Y-306.1. Part of a remarkable group of errors on Chinese coppers we are offering in this sale. Variety with uncreased flag and dots on each side of "TEN CASH". The attribution to CL-HUN.71 is tentative as many of the diagnostics are weak or missing because of the brockage, which is about 35%. Well used and colored chocolate brown.

That this error and the others in this group are well circulated shows how little attention was paid to the fabric of the coins used every day.

SOVIET ISSUES

54704

(t) CHINA. Hunan Soviet. 20 Cash, ND (1931). NGC Genuine. An interesting and SCARCE countermarked issue displaying a hammer and sickle within a 5-pointed star applied to the obverse of a Hunan provincial 20 Cash. This countermark appears on usually heavily worn Imperial or Republican 10 and 20 Cash issues such as the case with the present survivor. Both the obverse and reverse exhibit light surface porosity as is commonly encountered on examples of this type. Despite its shortcomings an interesting issue sure to add depth to the next collection it enters.

It is claimed that these were once found among bags of Chinese coppers that were being melted by the Japanese during WWII; in total, it is believed that around 100 were found out of 30,000 coins.

一九三一年湖南蘇維埃二十文銅元。有趣而珍罕的戳記版。湖南省造二十文的正面打上五芒星戳記,内有錘和鐮圖案。戳記常打於經流通的大清或民國的十文、二十文上,此枚亦是如此。正反幣面均有輕微凹凸孔隙,屬此版特徵。除此以外,不失爲一枚饒有趣味,能豐富集藏得一枚錢幣。據稱是從被日軍在二戰期間正在熔毀的中國銅幣中發現,據信,當時30,000枚硬幣中,共尋回100枚。

(t) CHINA. Hunan Soviet. 20 Cash, ND (1931). NGC Genuine. An intriguing issue, characterized by a hammer and sickle design inside a 5-sided star countermark. As always appears to be the case, the mark was applied to a well-circulated 20 Cash coin, which happens to be an undated (1903) Empire-era 'Hu Poo' 20 Cash in this case. While few of these issues have appeared on the market, this piece is as nice as any, with the stamp displaying incredibly bold detail.

INDIA. Mughal Empire. Rupee, AH 1068 Year 1 (1658). Ahmadabad Mint. Muhammad Murad Baksh. NGC MS-63. KM-272.1; BMC-693-5. One-year type. The designs are boldly rendered, while the luster remains soft yet undiminished. VERY RARE quality for this fleeting type, this being the single finest example to thus far be certified by NGC.

Jumping at an opportunity, Murad Baksh declared himself emperor in November of 1657 after his father had fallen ill. Engaged in war shortly thereafter, he joined hands with his brother, Aurangzeb, in an attempt to defeat Dara Shikhoh, a heir-apparent to the Mughal throne. On July 7, 1658, while intoxicated, Aurangzeb had Murad Baksh captured, and he was transferred to a Gwalior prison. After three years there, he was executed. JAPAN. Silver Fantasy Nan Ryo Oban, ND (late 19th Century). VERY FINE. Diameter: 163x97 mm; Weight: 161.46 gms. Well made with bold stamps, textured fields, and a deep gray tone throughout. The reverse is blank.

An interesting and not very well published aspect of Japanese numismatics with lots of variety. These fantasy issues seem to have been manufactured in the late 19th century to accommodate collectors who had taken an interest in East Asian numismatics. The mass exodus of precious metal coinage after Commodore Perry opened Japan for trade resulted in supply shortages and as a direct result, these fantasy pieces were manufactured to fill the wants of eager Western collectors.

日本"臆造"南鐐銀大判壹枚。 重161.46 克。163 mm x 97 mm。 鑄打精良,戳記深峻,底板略帶質感,深灰色包漿覆蓋。反面 空白。

饒有趣味但並未爲人熟知的日本錢幣,版別繁多。這些臆造版似乎鑄與19世紀末,用以迎合對東亞錢幣感興趣的藏家。準將佩里打開日本貿易後,貴金屬錢幣大量流出,導致供應短缺。這些似是爲滿足西方藏家的炙熱需求所製。

Type I Manila overstrike, with serrated boarders and reverse legend; dies prepared by Don Benito de los Reyes. Overstruck on an 1827-LIMAEJM Peru 8 Reales. Typical crude manufacture with a somewhat flat uneven strike leaving much of the original host coin visible. The central arms of Spain on the reverse are quite bold and evenly worn while "Manila" is quite weak missing small portions of the letters. The details designation of "Hole" is due to being pierced just to the right at 12 near the rim of the obverse, but other issue such as earthen deposits and surface porosity are present mentioned for accuracy. Despite its shortcomings a presentable and affordable example great for the beginner to intermediate collector on a budget looking to add depth to their collection.

1828年菲律賓-秘魯壹圓銀幣。斐迪南七世。於1828年10月13日所頒布的法令下發行。Don Benito de los Reyes雕刻師所準備的模具。在1827-LIMAEJM秘魯8雷亞爾上疊打,典型的粗糙打鑄,略顯平坦不均,與原坯8雷亞爾的設計有重疊呈現。反面的中央可見西班牙國徽,鑄打深邃,磨損均匀,而"Manila"一字則爲弱打,部分字母從缺。NGC的"穿孔"標注是源於正面12點處的右側幣緣有穿孔,同時亦有其他瑕疵如積土及和表面孔隙。儘管有瑕,但仍是一枚價格相宜的藏品,適合入門至中級收藏家,豐富集藏深度。

PHILIPPINES. Philippines - Chile. 8 Reales, ND (1834-37). Isabel II. PCGS Genuine—Scratch, VF Details Gold Shield. KM-108; Basso-43. Type VI Countermark, crowned Y.II. within circle applied to the reverse of an 1834-SANTIAGO IJ Chile Peso. Issued by decree of 20 December 1834, suppressed 31 March 1837, by decree of 1 February 1836. A SCARCE host type for this countermark issue, especially when compared to most Mexican or Peruvian Republic host coins. The countermark itself is graded "EF Detail" and is boldly emplaced, while the coin is toned a pleasant medium to dark gray. The only drawback is the reverse, which exhibits some old scratches that are now toned along with the remainder of the surfaces.

END OF SESSION I

Terms & Conditions – Showcase and Collectors Choice Auctions

- 1. Auction Basics. This is a public auction sale ("Auction Sale") conducted by bonded auctioneers, Stack's Bowers Galleries or Stack's Bowers and Ponterio (hereinafter referred to as "Auctioneer" and at times as "Stack's Bowers"). Bidding in this Auction Sale constitutes acceptance by you ("Bidder") of all the Terms of Sale stated herein. Bidders may include consignors who may bid and purchase lots in the Auction Sale consigned by the consignor or by other consignors pursuant to their consignment agreement with Stack's Bowers ("Consignor" or "Consignors"). A Consignor that bids on their own lots in the Auction Sale may pay a different fee than the Buyer's Premium charged to all other Buyers. Stack's Bowers reserves the right to include in any auction sale its own material as well as material from affiliated or related companies, principals, officers or employees. Stack's Bowers may have direct or indirect interests in any of the lots in the auction and may collect commissions. THE TWO PRECEDING SENTENCES SHALL BE DEEMED A PART OF THE DESCRIPTION OF ALL LOTS CONTAINED IN THE CATALOG. Where the Consignor has repurchased a lot and the lot is either returned to the Consignor or otherwise dealt with or disposed of in accordance with the Consignor's direction, or pursuant to contractual agreement, Stack's Bowers reserves the right to so note in the prices realized or to omit a price from the prices realized. Stack's Bowers and its affiliates may bid for their own account at any auction. Stack's Bowers and its affiliates may have information about any lot that is not known publicly, and Stack's Bowers and its affiliates reserves the right to use such information, in a manner determined solely by them and for their benefit, without disclosing such information in the catalog, catalog description or at the auction. Bidder acknowledges and agrees that Stack's Bowers and its affiliates are not required to pay a Buyer's Premium, or other charges that other Bidders may be required to pay and may have access to information concerning the lots that is not otherwise available to the public. Any claimed conflict of interest or claimed competitive advantage resulting therefrom is expressly waived by all participants in the Auction Sale. Lots may carry a reserve ("Reserve"). A Reserve is a price or bid below which the Auctioneer will not sell an item or will repurchase on behalf of the Consignor or for Stack's Bowers. Reserves may be confidential and not disclosed. The Buyer is the Bidder who makes the highest bid accepted by the Auctioneer, and includes the principal of any Bidder acting as an agent.
- 2. Descriptions and Grading. Bidder acknowledges that grading of most coins and currency in this Auction has been determined by independent grading services, and those that are not may be graded by Stack's Bowers. Grading of rare coins and currency is subjective and, even though grading has a material effect on the value of the coins and currency, grading may differ among independent grading services and among numismatists. Stack's Bowers is not responsible for the grades assigned by independent grading services, and makes no warranty or representation regarding such grades. Bidder further acknowledges and agrees that grades assigned by Stack's Bowers and lot descriptions are based solely upon an examination of the coins and currency and are intended to identify coins and currency and note any perceived characteristics. However, coin grading and descriptions are subjective. Stack's Bowers does not warrant the accuracy of such grading or descriptions, nor do they in any way form the basis for any bid. All photographs in this catalog are of the actual items being sold but may not be the actual size or to scale.
- 3. The Bidding Process. The Auctioneer shall have the right to open or accept the bidding on any lot by placing a bid on behalf of the Consignor or his or her agent; a Bidder by mail, telephone, Internet or telefax; or any other participant in the Auction Sale. Bids must be for an entire lot and each lot constitutes a separate sale. All bids must be on increment as established by the Auctioneer, or half increment (a cut bid). Non-conforming bids will be rounded down to the nearest half or full increment and this rounded bid will be the bidder's high bid. No lot will be broken up unless otherwise permitted by the Auctioneer. Lots will be sold in their numbered sequence unless Auctioneer directs otherwise. All material shall be sold in separate lots to the highest Bidder as determined by the Auctioneer. Auctioneer shall have the right in its sole and absolute discretion to accept or decline any bid, establish bid increments, challenge any bid or bidding increment, to reduce any mail bid received, adjudicate all bidding disputes, to exclude any bidder and to determine the prevailing bid. The Auctioneer shall have the right, but not the obligation, to rescind the acceptance of any bid and place the lot(s) for Auction Sale again. Auctioneer's decision on all bidding disputes shall be binding and final. For the mail and Internet Bidder's protection, no "unlimited" or "buy" bids will be accepted. When identical bids are received for a lot, preference is given to the first bid received as determined by the Auctioneer. A mail bid will take precedence over an identical floor bid; a Floor Bidder, Telephone Bidder

and Live Internet Bidder must bid higher than the highest mail bid to be awarded any lot. Cut bids are only accepted on bids greater than \$500 and each bidder may only execute one cut bid per lot. Bids will not be accepted from persons under eighteen (18) years of age without a parent's written consent which acknowledges the Terms of Sale herein and agrees to be bound thereby on behalf of the underage Bidder. The auction sale is complete when the Auctioneer so announces by the fall of the hammer or in any other customary manner.

THIS IS NOT AN APPROVAL SALE. Bidders who physically attend the Auction sale, either personally or through an agent ("Floor Bidders") should carefully examine all lots which they are interested in purchasing. Bidders who bid by telephone, either personally or through an agent, or through our live auction software receive a similar benefit as Floor Bidders in being able to actively participate in the live Auction Sale ("Telephone Bidders" and "Live Internet Bidders"). Except as otherwise expressly provided in these Terms of Sale, NO PURCHASED ITEMS MAY BE RETURNED FOR ANY REASON. All prospective Bidders who examine the lot(s) prior to the Auction Sale personally assume all responsibility for any damage that Bidder causes to the lot(s). Stack's Bowers shall have sole discretion in determining the value of the damage caused, which shall be promptly paid by such Bidder.

Certain auctions or auction sessions, will be conducted exclusively over the Internet, and bids will be accepted only from pre-registered Bidders.

STACK'S BOWERS IS NOT RESPONSIBLE FOR ANY ERRORS IN BIDDING. All Bidders should make certain to bid on the correct lot and that the bid is the bid intended. Once the hammer has fallen and the Auctioneer has announced the Buyer, the Buyer is unconditionally bound to pay for the lot, even if the Buyer made a mistake. Stack's Bowers reserves the right to withdraw any lot at any time, even after the hammer has fallen, until the Buyer has taken physical possession of the lot. No participant in the Auction Sale shall have a right to claim any damages, including consequential damages if a lot is withdrawn, even if the withdrawal occurs after the Auction Sale.

- 4. Bidder Registration Required. All persons seeking to bid must complete and sign a registration card either at the auction or online, or otherwise qualify to bid, as determined in the sole discretion of the Auctioneer. By submitting a bid, the Bidder acknowledges that Bidder has read the Terms and Conditions of Auction Sale, the descriptions for the lot(s) on which they have bid, and that they agree to be bound by these Terms of Sale. This agreement shall be deemed to have been made and entered in California. The Bidder acknowledges that the invoice describing a lot by number incorporates the catalog and Terms of Sale. Person appearing on the OFAC list are not eligible to bid.
- 5. Buyer's Premiums. A premium of twenty percent (20%) based upon the total amount of the hammer (minimum of \$20), will be added to all purchases of individual lots, regardless of affiliation with any group or organization (the "Buyer's Premium"). A reacquisition charge may apply to Consignors pursuant to a separate agreement, which may be higher or lower than the Buyer's Premium.
- 6. Payment. Payment is due immediately upon the fall of the auctioneer's hammer. Payment is delinquent and in default if not received in full, in good funds, within fourteen (14) calendar days of the Auction Sale (the "Default Date"), without exception, time being of the essence. Unless otherwise agreed in writing prior to the Auction Sale, all auction sales are payable strictly in U.S. Dollars or Hong Kong Dollars. All invoices will be made in United States Dollars. If paying in Hong Kong Dollars, Buyer's invoices will be credited with the amount of U.S. Dollars received from Auctioneer's bank. Payments may be made by credit card, Paypal, Union Pay, check, wire transfer, money order and cashier's check. Cash transactions will be accepted in the sole discretion of Stack's Bowers, and if accepted, for any cash transaction or series of transactions exceeding \$10,000, a Treasury Form 8300 will be filed. Contact Stack's Bowers for wiring instructions before sending a wire. Bank wires sent from a foreign bank are subject to an international bank wire fee of \$35. We accept payment by Visa, MasterCard, American Express, Discover or Paypal for invoices up to \$2,500, with a maximum of \$10,000 in any 30 day period. All payments are subject to a clearing period. Checks drawn on U.S. banks will be subject to up to a 10 business day hold, and checks drawn on foreign banks will be subject to a 30 day hold. Stack's Bowers reserves the right not to release lots for which good funds have not yet been received. On any past due accounts, Stack's Bowers reserves the right, without notice, to extend credit and impose carrying charges (as described below). Buyers agree to pay reasonable attorney's fees

Terms & Conditions – Showcase and Collectors Choice Auctions (cont.)

and cost incurred to collect past due accounts. Any invoice not paid by the Default Date will bear a five percent (5%) late fee on the invoice amount. Buyers personally and unconditionally guarantee payment in full of all amounts owed to Stack's Bowers. Any person submitting bids on behalf of a corporation or other entity, by making such bid, agrees to be personally jointly and severally liable for the payment of the purchase price and any related charges and the performance of all Buyer obligations under these Terms of Sale and Stack's Bowers reserves the right to require a written guarantee of such payments and obligations. Bidders who have not established credit with Stack's Bowers must furnish satisfactory information and credit references and/or deposit at least twenty-five percent (25%) of their total bids for that Auction Sale session(s) or such other amount as Stack's Bowers may, in its sole and absolute discretion require before any bids from such Bidder will be accepted. Deposits submitted will be applied to purchases. Any remaining deposits will be promptly refunded, upon clearance of funds.

- 7. Sales Tax. Buyers will be charged all applicable sales tax unless a valid Resale Certificate has been provided to the Auctioneer prior to the auction. Should state sales tax become applicable in the delivery state prior to delivery of the property on the invoice, the Buyer agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. In the event any applicable sales tax is not paid by Buyer that should have been paid, even if not such tax was not charged or collected by Stack's Bowers by mistake, error, negligence or gross negligence, Buyer nonetheless acknowledges responsibility to pay such sales tax and remains fully liable for and agrees to promptly pay such taxes on demand, together with any interest or penalty that may be assessed by the taxing authority and agrees to indemnify and hold Auctioneer harmless from any applicable sales tax, interest or penalties due. Lots from different Auctions may not be aggregated for sales tax purposes.
- 8. Financial Responsibility. In the event any applicable conditions of these Terms of Sale herein are not complied with by a Buyer or if the Buyer fails to make payment in full by the Default Date, Stack's Bowers reserves the right, in its sole discretion, in addition to all other remedies which it may have at law or in equity to rescind the sale of that lot or any other lot or lots sold to the defaulting Buyer, retaining all payments made by Buyer as liquidated damages, it being recognized that actual damages may be speculative or difficult to compute, and resell a portion or all of the lots held by Stack's Bowers, in a commercially reasonable manner, which may include a public or private sale, in a quantity sufficient in the opinion of Stack's Bowers to satisfy the indebtedness, plus all accrued charges, and Stack's Bowers may charge a seller's commission that is commercially reasonable. More than one such sale may take place at the option of Stack's Bowers. If Stack's Bowers resells the lots, Buyer agrees to pay for the reasonable cost of such sale, together with any incidental costs of sale, including reasonable attorney's fees and costs, cataloging and any other reasonable charges. Notice of the sale shall be by U.S.P.S. Certified Mail, Return Receipt Requested to the address utilized on the Bid Sheet, Auction Consignment and Security Agreement or other last known address by Stack's Bowers. The proceeds shall be applied first to the satisfaction of any damages occasioned by Buyer's breach, then to any other indebtedness owed to Stack's Bowers, including without limitation, commissions, handling charges, carrying charges, the expenses of both sales, seller's fees, reasonable attorneys' fees, costs, collection agency fees and costs and any other costs or expenses incurred. Buyer shall also be liable to Stack's Bowers for any deficiency if the proceeds of such sale or sales are insufficient to cover such amounts.

Buyer grants to Stack's Bowers, its affiliates and assignees, the right to offset any sums due, or found to be due to Stack's Bowers, and to make such offset from any past, current, or future consignment, or purchases that are in the possession or control of Stack's Bowers; or from any sums due to Buyer by Stack's Bowers, its affiliates and assignees. In addition, defaulting Buyers will be deemed to have granted to Stack's Bowers, its affiliates and assignees, as security interest in: (x) the purchased lots and their proceeds, and (y) such sums or other items and their proceeds, in the possession of Stack's Bowers, its affiliates or assignees, to secure all indebtedness due to Stack's Bowers and its affiliated companies, plus all accrued expenses, carrying charges, seller's fees, attorney fees, and costs, until the indebtedness is paid in full. Buyer grants Stack's Bowers the right to file a UCC-1 financing statement for such items, and to assign such interest to any affiliated or related company or any third party deemed appropriate by Stack's Bowers. If the auction invoice is not paid for in full by the Default Date, a carrying charge of one-and-one-half percent (1-1/2%) per month may be imposed on the unpaid amount until it is paid in full. In the event this interest rate exceeds the interest

permitted by law, the same shall be adjusted to the maximum rate permitted by law, and any amount paid in excess thereof shall be allocated to principal. Buyer agrees to pay all reasonable attorney's fees, court costs and other collection costs incurred by Stack's Bowers or any affiliated or related company to collect past due invoices or to interpret or enforce the terms hereof or in any action or proceeding arising out of or related to the Auction Sale. Stack's Bowers reserves the right to assign its interest to any third party.
